

FOR IMMEDIATE RELEASE:

New Low-Profile Dual 12-inch Co-ax Monitor added to VTC Line

Toronto Ontario, November, 2010 – The new VTC C5 low profile wedge monitor is capable of delivering accurate reproduction and outstanding clarity from a very compact 1380 watt cabinet. Designed specifically for medium and large stage plots, the C5 cabinet angle and uniform 60° x 60° directivity provides optimal coverage even in the most demanding touring applications.

The Neodymium magnet coaxial driver with 2.5-inch titanium diaphragm horn assembly delivers 180 watts of high frequency program with a full 60° x 60° degree coverage. The two 12-inch Neodymium woofers add an additional 1200 watts of low frequency support making the C5 a uniquely efficient high power monitor solution. The cabinet's unique low profile design maximizes stage visibility while providing full coverage. By design, the C5 can be changed from right facing to left facing horn assembly quickly and easily in the field.

Built for touring applications, the VTC C5 uses a solid 5/8-inch (15mm) 11-ply Russian Birch plywood cabinet construction; integrated handles and a heavy-gauge perforated all metal grille to protect the speaker components.

ABOUT VTC ProAudio – Yorkville Sound, a leading manufacturer and distributor of professional loudspeakers, amplifiers, powered mixers and accessories for MI retail since 1963 launched the VTC ProAudio brand with the introduction of Elevation Series line array enclosures in 2008.

Designed and manufactured in North America and distributed by Yorkville Sound (Toronto), VTC ProAudio enclosures use patented technologies by Tom Danley of Danley Sound Labs to create a vertical array sound reinforcement solution for touring applications or fixed installations as well as an array of point source cabinets, digital signal processing and power amplifiers.

ABOUT YORKVILLE – Yorkville Sound has been a manufacturer of PA systems and loudspeakers, Traynor instrument amplifiers, installed audio systems and accessories since its inception in 1963. The company now employs over 200 people in a 150,000 sq ft facility in Pickering Ontario, Canada (a suburb of Toronto).

In addition to its manufacturing capability, Yorkville Sound is an importer and distributor of microphones, cables, stands and accessories under the Apex brand as well as studio effects, signal processors, microphone preamps and accessories under the brand name Applied Research & Technology (ART) originally based in Rochester New York. Yorkville Sound is also the exclusive distributor of Hughes & Kettner Amplifiers for North America; Epiphone Guitars, Gibson Guitars, Beyerdynamic Microphones & Headphones as well as Gallien-Krueger amplifiers for Canada, and distributes the Alto line of PA, effects and signal processing for the United States.
